

I would like to submit my strong opposition to any BPL regulations that do not provide MUCH MUCH MUCH stronger support to Shortwave Radio Listeners and Ham Radio Operators that very actively use the 2 - 30 MHz PUBLIC PUBLIC PUBLIC (EMPHASIS ON PUBLIC!) HF Radio Spectrum. The interference generated by BPL will heavily impact radio enthusiasts.

Placing the burden of proof on the SWL or HAM operator to prove interference in BPL interference in each case is an impossible burden on average Shortwave Listeners like myself also. Please either kill BPL or provide much, much stronger protections to destroying the use of the public airwaves! Thank you for your quick attention to this matter.
